

<< Test First Name >>,

I was ecstatic to see the Supreme Court saved millions of American workers from being under threat of neverending testing or losing their jobs with Failed Biden's unconstitutional vaccine mandates.

But, we cannot forget that the fight is far from over...

Even though SCOTUS made it clear the federal government cannot compel regular businesses to impose a ridiculous vaccine mandate, **we must win the fight to ensure vaccine mandates cannot be pushed at the state level right here in Nevada!**

Biden-backed Sisolak is just another radical Democrat lackey, and with the news on COVID contradicting itself every other day, we cannot take the risk of allowing Sisolak to impose the Biden mandates on Nevada's workers.

WE CANNOT IMPOSE VACCINE MANDATES IN NEVADA!

Nevadans already have access to take the vaccine if they want to do so. Making it a forced vaccination is simply keeping the economy shut down for the sake of a Fauci fear-mongering narrative.

Not to mention... Fauci was ***exposed*** by Senator Rand Paul for targeting medical experts who did not conform to his own COVID narrative!

Conservatives need to stand together in stopping this mandate insanity. Before today is over, help me get to Carson City so I can put a stop to this radical Left agenda for good!

Rush a generous contribution today:
