

Jim,

It is important during this period when our country is being subjected to the radical policies of Joe Biden that we elect an **America First conservative** to the Senate.

*The current 50-50 split in the Senate is terrifying, and we must keep the seats we have and add true conservatives in the 2022 election cycle.* Republicans in the Senate are the last line of defense against court-packing, the Green New Deal, partisan liberal judges, and the rising levels of inflation under the Biden Administration.

**I am excited to announce today my candidacy for U.S. Senate—to finish the last four years of Senator Jim Inhofe's current term.**

**I will continue President Trump's America First mission in the Senate and fight for the same conservative policies that helped our country prosper under President Trump.**

**I have the background to pull it off.** I'm a businessman, and served as Chief of Staff of the National Security Council during the Trump Administration. During this time, I traveled the country and the world with President Trump and was at his side during key moments, including some of the biggest counterterrorism operations of the Trump presidency.

I am looking forward to introducing myself to the people of Oklahoma and sharing our vision not only for Oklahoma but our country's future.

I humbly ask you to join me and consider donating any of the following amounts:
